Epidemiology

Epidemiological comments
Blockade, disinfection and screening detection measures continue to be implemented in the infected areas in Liaoning Province. Up to August 29, 246,100 farms and 63,861,600 pigs were screened. Investigation of the infected areas in Liaoning province has been completed. In total 19,373 pigs were killed and disposed of, including 8,116 pigs in the epidemic area and 11,257 pigs in the process of screening and tracing. Seven new pathogenic positive cases were detected from 59 samples collected from 4 pig farms in 2 towns of Shenbei New District. Details of 7 pathogenic positive cases are provided below. 1. 3 pig farms in Cailuo yi village of Cailuo subdistrict. Farm 1: There were 160 pigs on the farm. 15 whole blood samples were taken from the farm, from which 3 samples tested positive. Farm 2: There were 55 pigs on the farm. 10 whole blood samples were taken from the farm, from which one sample tested positive. Farm 3: There were 216 pigs on the farm. 20 whole blood samples were taken from the farm, from which 2 samples tested positive. 2. 1 pig farms in Yinjia village of Yinjia subdistrict. The Farm: There were 140 pigs on the farm. 14 whole blood samples were taken from the farm, from which one sample tested positive. All pigs were killed, disposal of bodies, all contact materials and disinfection for infected sites have been completed. World Animal Health Information and Analysis Department (WAHIAD, OIE) comment: In this report, the numbers of Susceptible and Killed and disposed of animals in the first outbreak (Shenbei Street) were updated by the country.
Source of the outbreak(s) or origin of infection
• Unknown or inconclusive

Measures applied

Applied	To be applied
<ul style="list-style-type: none">• movement control inside the country• surveillance outside containment and/or protection zone• screening• traceability• quarantine• official destruction of animal products• official disposal of carcasses, by-products and waste• stamping out• control of wildlife reservoirs• zoning• disinfection	<ul style="list-style-type: none">• no planned control measures
Animals treated	Vaccination Prohibited
No	No
